As one of the fastest-growing collaboration and productivity platforms, Slack is used by over 750,000 companies globally every day. Vital communications happening every second across private & public channels, multiparty chats, user accounts and direct messages are not only discoverable but subject to compliance by FINRA, SEC, HIPAA, FDA, among other regulations.

Slack eDiscovery powered by Complete Connector allows for efficient and secure capture, discovery, and production of Slack data – uncovering relevant information you need to make smarter decisions and maintain compliance with applicable regulations.

Secure, Compliant Slack eDiscovery with Complete Connector

Consilio's end-to-end solution is designed to automate and integrate the review of mobile data to a format that can be easily understood, searched, analyzed, and reviewed. Consilio Complete Connector delivers:

- **Proven Slack Data Expertise** – Consilio experts have worked with law firm and corporate clients on hundreds of matters involving mobile, chat & messaging data, including Slack Plus and Slack Enterprise Grid.
- **Ability for internal teams to perform collections and streamline workflows** – focusing and simplifying the collections process while arriving at critical insights faster.
- **Compatibility with all major review platforms, including Relativity® and Sightline** – Combined with expert project managers to select the best experience for your project, filtering chat noise, focusing and prioritize your Slack reviews.
- **Multilingual & Global Support** – Mobile chat, messaging technologies and workflows can be adapted to any language including Chinese, Japanese, and Korean. Certified & audited global infrastructure conforms to data privacy & security regulations.

Simplified Slack eDiscovery Powered by Complete Connector

Client engages or Consilio recommends Slack eDiscovery workflow based on project specifications

Understanding the client / matter requirements as well as existing Slack licensing, Consilio forensics experts will advise and guide Client through a best practice Slack collection.

Consilio Data Operations experts will direct data processing based on client's specifications – focusing on data range, channel, custodian as needed / available.

Once processing is complete, review may commence in Relativity or Sightline per client's preference. Filter / search options as well as formatting of threaded conversations vary based on the originating license (Standard, Plus, or Enterprise).

Reviewed data can be produced or batch printed per client and/or regulator requirements.
